Christopher R. Bernard  
Manager – Regulatory Policy (Transmission)  
Northeast Utilities Service Company  
107 Selden Street  
Berlin, CT 06037

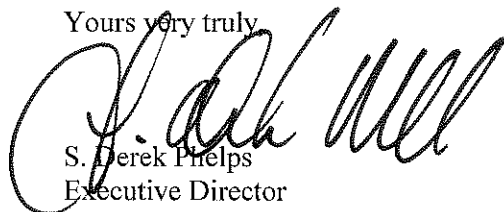

RE: **DOCKET NO. F-2010** – Connecticut Siting Council Review of the Ten-Year Forecast of Connecticut Electric Loads and Resources

Dear Mr. Bernard:

The Connecticut Siting Council (Council) requests your responses to the enclosed questions no later than July 21, 2010. To help expedite the Council's review, please file individual responses as soon as they are available.

Please forward an original and 15 copies to this office, as well as one electronic Adobe .pdf version on a CD. In accordance with the State Solid Waste Management Plan, the Council is requesting that all filings be submitted on recyclable paper, primarily regular weight white office paper. Please avoid using heavy stock paper, colored paper, and metal or plastic binders and separators. A list of parties and intervenors is enclosed. Fewer copies of bulk material may be provided as appropriate.

Yours very truly

S. Derek Phelps  
Executive Director

SDP/MP

c: Council Members  
Parties and Intervenors

*Chris -  
Have your's well.*

**Docket F-2010**  
**CL&P Pre-Hearing Interrogatories**

1. On page 10 of The Connecticut Light and Power Company's 2010 Forecast (CL&P Forecast), the 50/50 forecast is provided along with load factors. The load factors appear to decline over the forecast period. Is this because the peak load is growing at a faster rate than the energy output? Explain.
2. On page 11 of the CL&P Forecast, there are no gigawatt-hours (GWh) reported from ISO-NE's Load Response Program (ISOLRP). Is this because the limited number of hours that the ISOLRP is in use results in a negligible energy savings in GWh? Explain.
3. On page 11 of the CL&P Forecast, the Net Electrical Energy Output Requirements are listed. Are these based on the 50/50 forecast scenario? If yes, provide a similar table based on the Extreme Hot Weather Scenario.
4. Provide the basic underlying assumptions associated with the distributed generation (DG) included in Table 2-2 of the CL&P Forecast, including but not limited to the DG projects approved, number of megawatts of each DG project, the number of units expected to go into service or the assumed probability that it will go into service, etc.
5. In the context of the Conservation and Load Management Program (C&LM Program), explain the difference between passive and active resources.
6. Is CL&P's C&LM Program limited to passive resources?
